

**ELECTRIC SPOT SPRAYERS**

Heavy duty spot sprayers are custom built with the quality and features that professionals demand.

**Standard Features:**

- 14 or 25 gallon polyethylene tanks with molded-in inserts for convenient mounting of tank, pump and accessories.
- Flojet® and Delevan 12 volt diaphragm pump with chemical resistant Viton diaphragm and valves.
- Large easy-to-clean suction strainer.
- Adjustable pressure control valve for precise calibration and easier priming.
- Jet agitation for even chemical mixing.
- Durable liquid filled pressure gauge.
- 20' of 3/8" reinforced vinyl hose rated at 200 PSI.
- TriggerJet® heavy duty spray wand with strainer and adjustable spray nozzle.

**ELECTRIC UTILITY SPRAYERS**

Minnesota Wanner Company offers a variety of economical, quiet electric pumps to fit many spraying applications. Steel and stainless steel frames and polyethylene tanks are combined with the right pump to meet your requirements. These are not assembly-line sprayers. Each sprayer is designed to do your job.
