

PAK - TANK SPRAYERS

The Pak-Tank Series of sprayers offers all the features necessary to handle tough spraying and root feeding jobs at a competitive price.

- Stainless steel tanks from 50 - 500 gallons.
- Larger tanks are baffled to minimize surge.
- Mechanical agitation to handle wetttable powders.
- 16" stainless steel manhole for easy access and mixing.
- Basket strainers help keep tank cleaner.
- Abrasion resistant diaphragm pumps.
- Honda industrial engines.
- Low maintenance direct drive gear reductions.
- Also available as a tank and frame unit.

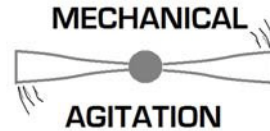

STAINLESS STEEL

Model **NF100**
100 Gallon Tank
9.5 GPM

Perfect size for starting a root feeding or spraying program or as an isolated system on larger equipment to keep unwanted chemicals out of the main sprayer.

Model **SK200E5**
200 Gallon Tank
9.5 GPM

200 gallon size is a popular choice for both lawn and tree care professionals. Large enough to do a good day's work and small enough to fit a standard pickup bed.

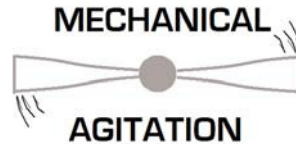

PAK-TANK SPRAYERS

Model **SK400LPE8**
14 GPM Pump

Larger tank and higher output pump will handle 1 or 2 operators for root feeding or lawn fertilizing. Mechanical agitation will handle tough to dissolve fertilizers.

Model **SK500LP**
500 Gallon Tank
Choice of pumps up to 20 GPM

Special low profile tank is ideal for short bed trucks or trailers. Wide skid frame can be set up with direct or belt drive pumps for a larger choice of outputs.

PAK-BLAST

Compact Air Blast Sprayer with 3-point hitch, shielded PTO driveline, stainless steel tanks and manifolds. 11 GPM diaphragm pump and a 22" or 24" fan. Also available in a variety of trailer mounted models.
