

## STAINLESS STEEL ROOTFEEDER

At the very top of our K91-SS rootfeeder is a heavy duty brass swivel that rotates 360° degrees to lessen operator fatigue and the stress on your spray hose.

The stainless steel handles are welded for strength and padded for comfort.

The heavy duty brass trigger valve is easy to service and features a balanced pressure design and a custom made, padded trigger to ensure a short, light trigger pull.

The main body is also made of stainless steel with 2 step bars welded on for durability.

Our replaceable needle is one piece of schedule 80 stainless steel pipe with a 1 1/2" solid stainless steel tip welded to one end. No threads enter the ground and metering holes are on the side to help prevent clogging. 2 or 4 hole available.

An adjustable stainless steel splash guard lets you set your depth for safety and consistency.

**Replacement Needles:**

**#K91-N2-13      2 Hole needle, 13" long**

**#K91-N4-13      4 Hole needle, 13" long**

## KINGSTON QUICK-OPENING VALVE

**305B**

Model 305B is a normally closed quick opening, self closing valve of heavy brass construction. Precision machined for positive seating. Ports are 1/2" FIPT and the valve has a maximum working pressure of 400 PSI.

**Valve and Handle Assembly      #305B**

**Valve Only      #305B-4-3**

**Repair Kit      #305B-4-Kit**

**Valve Handle      #K91-VH**

**Valve Handle Bracket      #305A405**

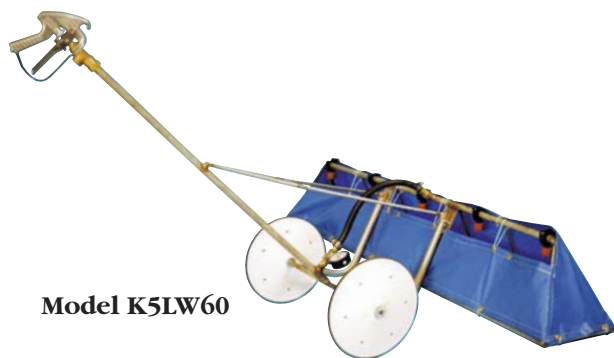

## ECONOMY ROOTFEEDER

Features the same 1 piece stainless steel needle as our top of the line model with a galvanized body and 43HC shut-off gun.

**#K18-SF**

## HOODED SPRAY CART

Model K51W60

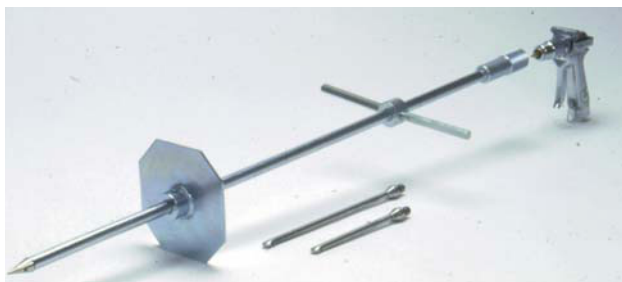

Used for years by professional grounds keepers for spraying under less than ideal wind conditions, or anytime when an even spray pattern with extra drift control is required.

### Features include:

- Lightweight stainless steel tubular construction.
- Strong, non-corrosive stainless steel frame with 5' spray bar.
- Lightweight poly hood with window for checking pattern of spray tips.
- Head adjustable for height.
- Quality spray gun and liquid filled gauge.
- Plastic wheels don't corrode. Low rolling resistance.
- Lightweight - 26 pounds.

## HEAVY DUTY ROOTFEEDER

Heavy Duty Rootfeeder attachment will fit your JD9-C or JD9-CT (page 78) spray gun. Rugged long lasting design for pressure root feeding from 2 to 10 inches deep. Foot plate and hand bars are adjustable. Replaceable tips thread into galvanized steel body.

**38919** Heavy-duty feeder; complete with 2-hole tip

**38918** 3-hole tip, only

**38901** 4-hole tip, only

**38917** 2-hole tip, only

## SURFACE ROOT FEEDER

**38502**  
Trigger Valve

**39919**  
Rootfeeder

The Green Garder® HD-8 surface root feeder attachment is lightweight and easy to handle. This is the perfect tool for light or worked up soils. The HD8 will fit your JD9-C or JD9-CT Spray Gun or order #38502 JD9-GTB Trigger Valve.
