

STAINLESS STEEL TANKS

Minnesota Wanner Company builds stainless steel tanks for truck, skid and trailer mounted sprayers. Tanks are made from heavy gauge stainless steel and precision welded. Features available include: sight gauges, multiple compartments, baffles, storage compartments and mechanical agitation.

Call or write factory with your specific size and gallonage requirements for a prompt quotation.

STAINLESS STEEL

Multiple compartments and dry storage areas add versatility without detracting from professional appearance.

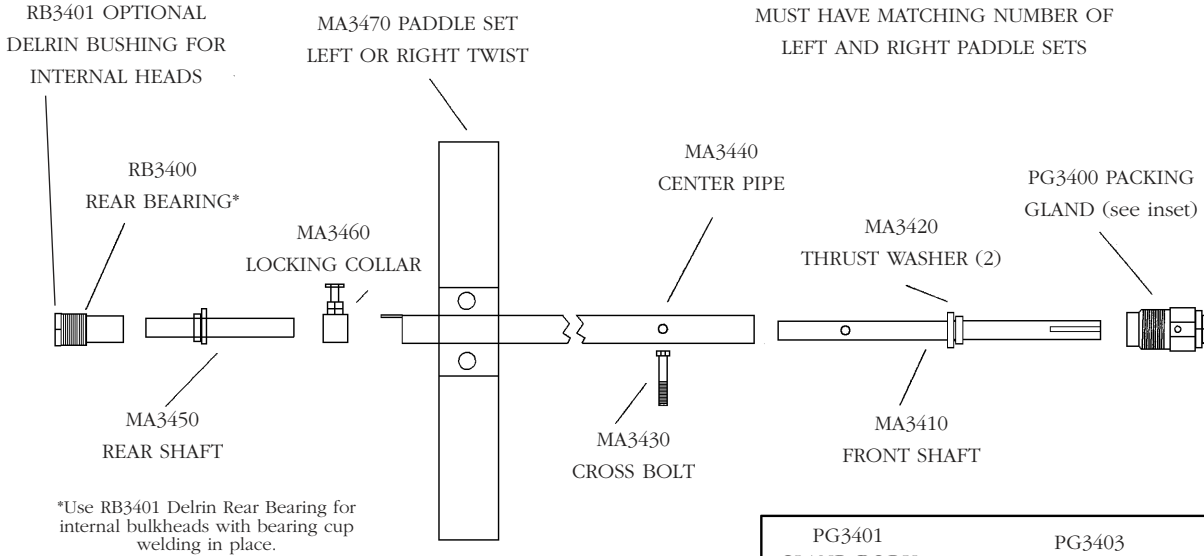

All stainless steel, one piece sills and decking or sills only for direct chassis or flatbed mounting.
