

HEAVY DUTY STAINLESS STEEL SPRAYERS

840 gallon split

For over 40 years Minnesota Wanner stainless steel sprayers have been at the top of the list of heavy duty low maintenance equipment for tree spraying, root feeding, turf and pest control.

Because we manufacture all of our tanks in house we can offer features and customization that “one size fits all” companies can’t match.

Our full round design tanks are designed for maximum strength, efficient agitation and drainage. Heavy duty mechanical agitation is standard to handle hard to suspend materials and jet agitation is available for smaller compartments.

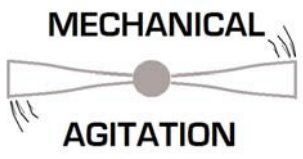

We complete your unit with top of the line components like HydraCell industrial duty diaphragm pumps, Hannay hose reels, Honda and Duetz engines and stainless steel plumbing.
